SUMMARY

Third-year Computer Science student with experience in development and data-driven projects. Strong interest in Artificial Intelligence, Data Analytics, and building innovative solutions with real-world impact.

SKILLS

Programming: Python, Java, C, C++, SQL. **Others:** Git, Prompt Engineering, Dev tools, Tableau, CS Fundamentals.
Language: English, Kannada, Hindi.

EXPERIENCE

GenX Reality January 2025 – July 2025
Developer Intern *Remote*

- Landing Page Development: Designed and developed a responsive landing page for the company, ensuring a modern and user-friendly interface.
- Built a full-stack website with interactive UI and optimized backend performance.
- Social Media Management: Handled the company's social media accounts, enhancing online presence and engagement.

1M1B (1 Million for 1 Billion) November 2024 – February 2025
Data Analytics Intern *Remote*

- Led sustainability campaigns, securing 50+ pledges and promoting green practices.
- Conducted energy audits and provided waste-reduction recommendations for campus sustainability.
- Assisted in data collection and reporting for energy efficiency and sustainability projects.
- Trained in Tableau for tracking and visualizing key sustainability metrics.

IIT-Tirupathi Navavishkar I-Hub Foundation July 2025 – September 2025
Star PNT Intern

- Designed a **NAVIC-enabled cattle tracking system** using LoRaWAN + NB-IoT hybrid architecture for low-cost, long-range monitoring.
- Developed and analyzed **geofencing algorithms** (Haversine formula, Kalman filter with sensor fusion) to improve accuracy and reduce false alerts.
- Contributed to a **research blueprint** covering hardware design, firmware strategy, and field validation for scalable rural deployment.

EDUCATION

Jain Deemed-to-be University Expected Graduation: May 2027
Bachelor of Computer Applications *CGPA: 7.52*

– **Relevant Coursework:** CS Fundamentals, Software Engineering, Data Base Management System, Data Structures, Operating System, Data Analytics.

CERTIFICATIONS

Artificial Intelligence: Generative AI: Introduction and Applications (IBM; Coursera)
Programming: Python, The Structured Query Language (SQL) (University of Michigan, University of Colorado Boulder; Coursera)
Other: Statistics Foundations, The Bits and Bytes of Computer Networking, Introduction to Data Analytics, Software Engineering: Modeling Software Systems using UML (Meta, Google, IBM; Coursera)

ACTIVITIES

Navarith Student Forum Jain University, BCA
Research and Development Member *Oct 2024 – Present*

– Member of R&D Club (On-going Involvement)
– Collaborated with team to implement solutions and strategies for improving forum activities and events.
